

Health and Safety Policy

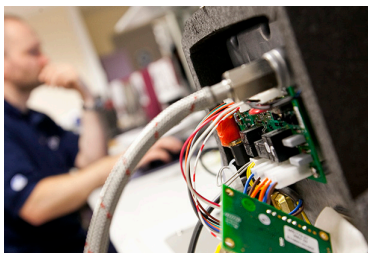

Munster Simms Engineering Limited is engaged in the business of the design, development, manufacture, marketing, sale, and delivery of pumps, water systems, and water and space heaters, for the RV, Marine and other niche markets.

It is our aim to provide a safe and secure environment for all employees, contractors and visitors. We will do this by assessing the risks, understanding the needs of all persons on the premises, and taking relevant steps to guard against harm and injury from all sources within our control.

We will adhere to current regulations and directives, be proactive in the timely implementation of any future regulatory requirements, and encourage employees to participate in relevant health and safety activities.

Appropriate training, auditing, equipment, and resources will be made available to employees to ensure compliance and to drive continuous improvement. Health & Safety compliance, and continual improvement, are also the personal responsibility of every employee and requires appropriate levels of dedication and commitment.

Our Health & Safety Management System is based on the requirements of OHSAS 18001:2007, and will be regularly reviewed, updated, communicated, and published, as required.
