Read the following carefully before installation

To the Fitter:
Check that the product is suitable for the intended application. Follow these installation instructions and ensure all relevant personnel read the points listed below. Also ensure that these operating instructions are passed on to the end user. The manufacturer cannot be held responsible for claims arising from incorrect installation, unauthorised modification or misuse of the product.

To the User:
Read the following instructions carefully.

1. APPLICATION

All locker doors and deck hatches provide easy access to the storage space, while keeping these areas dry through their robust, watertight design. Aluminium models are suitable for sandy environments. LD4002 features a clear polycarbonate lid for easy inspection, without having to open the locker. Please note they are not suitable for any other purpose. Your warranty will be invalidated if the product is used in any other applications.

2. WARNINGS

With all applications, it is important that a system of safe working practice is applied to installation, use and maintenance:

- Check mounting area is free from hazards e.g. electrical wiring before drilling.
- **Not** suitable for use below the waterline.
- **Do not** use for direct access to a fuel storage tank.
- **Must be** mounted on a flat surface.
- Use an appropriate seal or sealant between flange and mounting surface (not provided).
- Use appropriate screws for mounting locker lid / deck hatch.

4. INSTRUCTIONS FOR INSTALLATION

For Part Number:-

LD2000

Drill out the 12 dimples on the flange ring.

On a suitable flat surface, and using the flange ring as a template, mark off the 12 mounting holes and the central hole on the mounting surface. Drill out central circle 178mm (7") and 12 pilot holes for mounting. Use 12 appropriately sized self-tapping screws for mounting the flange ring. An appropriate seal or sealant must be used between the aluminium flange ring and the mounting surface.

For Part Number:-

LD3000

Drill out the outer 16 dimples on the flange ring.

On a suitable flat surface, and using the flange ring as a template, mark off the 16 mounting holes and the central slot on the mounting surface.

Using an ø83mm (3 ¼") circular saw, cut two holes 60mm (2 3/8") apart from their centres. Drill 16 pilot holes for mounting. Use appropriate cutting tool to remove remaining material on mounting surface. Use 16 appropriately sized self-tapping screws for mounting the flange ring. An appropriate seal or sealant must be used between the aluminium flange ring and the mounting surface.
On a suitable flat surface, and using the flange ring as a template, mark off the 10 mounting holes and the central hole on the mounting surface.

Drill out the 10 pilot holes for mounting, and the central Ø195mm (7 3/4”) hole.

Use 10 appropriately sized self-tapping screws for mounting the flange ring. An appropriate seal or sealant must be used between the ABS flange ring and the mounting surface.

5. SERVICE KITS

AK4010 - Seal and O-ring Service Kit for LD2000, LD4000 and LD4002 models
AS2006 - Cover and Locking Lever Replacement Service Kit for LD2000
AS3006 - Cover and Locking Lever Replacement Service Kit for LD3000

6. MAINTENANCE

These locker doors should be regularly checked for damage/wear. Rubber seals should be replaced if worn, or every three years. Refer to Section 5.
